Subject: Continue the Suit

The terms of this settlement with Microsoft are ludicrous. The terms negotiated with Microsoft only further its monopolistic behaviors. They must be rolling in the streets in Redmond. I cannot believe that the DOJ is willing to roll over and play dead with one of the largest anti-competitive corporations in the world!

I am a computer consultant in the field of healthcare. Microsoft is a bully in every sense of the word. Microsoft stifles innovation and competition at every juncture in software development. If a developer releases work that receives a following, Microsoft back-engineers the code and releases it as part of the operating system.

Give me a break! You must not settle.
